Int. J. Pres. Ves. & Piping **27** (1987) 401–402

CONTENTS OF VOLUME 27

Number 1

Evaluation of Core Spray Line Cracks from Nine Mile Point Unit No. 1 and Isolation Condenser Cracks at Oyster Creek Unit No. 1 1
C. J. CZAJKOWSKI (USA)

The Effect of a Superimposed Compressive Load on the Failure of a Stainless Steel Pipe Containing a Through-wall Circumferential Crack. Part II: Bending Deformation is Displacement-controlled 17
E. SMITH (Great Britain)

Local Radial Loads on Cylinders: BS5500 Predictions versus Experimental Results 33
G. E. FINDLAY and W. TIMMINS (Great Britain)

The Presentation of Results from Round-Robin Test-Block Trials 49
J. A. G. TEMPLE and M. W. STRINGFELLOW (Great Britain)

Number 2

A Model for PWR Pressure Vessel Embrittlement 91
S. B. FISHER and J. T. BUSWELL (Great Britain)

Pressure Loading and Bending of Hollow Tori 137
A. COLLE, D. REDEKOP and C. L. TAN (Canada)

Announcements 155

Number 3

Fatigue Crack Propagation Characteristics of Submerged Arc Weldment Material in a Simulated PWR Environment at the Outlet Coolant Temperature . . 159
J. H. BULLOCH (South Africa)

Parameter Adjustment of a Finite Element Model by Means of Measured Natural Frequencies 179
F. STEINWENDER and R. NORDMANN (Federal Republic of Germany)

Calculated Signal Amplitudes for Ultrasonic Time-of-Flight Diffraction Signals for Tilted or Skewed Cracks 191
J. A. G. TEMPLE (Great Britain)

Int. J. Pres. Ves. & Piping (**27**) (1987)—© Elsevier Applied Science Publishers Ltd, England, 1987. Printed in Great Britain

The Stability of Growth of a Through-Wall Circumferential Crack in a Cylindrical Pipe Subjected to Bending Deformation 209
E. SMITH (Great Britain)

Failure Prediction of Low-Carbon Steel Pressure Vessel and Cylindrical Models 223
K. D. ZHANG and W. WANG (People's Republic of China)

Announcements 235

Number 4

Reheat Cracking—a Review of Recent Studies 239
A. DHOOGE and A. VINCKIER (Belgium)

Application of Moire Technique in Fracture Analysis. 271
ZENGQIANG WU, ZHIWEN WANG and DING-YI JU
(People's Republic of China)

Trends in Pressure Vessel Design: Vessel Size Increase by Using Prestressed Concrete Pressure Vessels for Coal Gasification and Oil Desulfurization . . 285
J. NÉMET, K. FRITZ and H. ZEMANN (Austria)

Behaviour of a Prestressed Concrete Pressure Vessel with Hot Liner . . . 293
A. WITT, H. ZEMANN and R. SCHEIBER (Austria)

Glass Reinforced Composites of Mixed Wall Construction. 305
D. R. HOSE and R. KITCHING (Great Britain)

Number 5

Investigation of a Reactor Coolant Pump Seal from Indian Point Unit No. 2 . 325
CARL J. CZAJKOWSKI (USA)

The Contact Stress Analysis of Plate and Shell Structures in Pressure Vessels . 335
HUEILIN CHIEN and SANTUNG TU (People's Republic of China)

Evaluation of Intergranular Cracks on the Ring Header Cross at Grand Gulf Unit No. 1 353
CARL J. CZAJKOWSKI (USA)

An Elastic–Plastic Analysis of the Integral Tubesheet in *U*-tube Heat Exchangers—Towards an ASME Code Oriented Approach 367
A. I. SOLER and K. P. SINGH (USA)

A Simplified Bending Analysis of Imperfect Spherical Pressure Vessels . . 385
LUIS A. GODOY
